Hot Food Warmers and Cold Plates from Mayfair

Mayfair introduces a new concept of hot and cold servers that have stepped out from the traditional chafing dishes. Forget about having to heat up with fire and water or keep cool with ice.

The Mayfair Hot Food Warmer is a stainless steel electric heating plate that works independently as a warming tray. The warmers are equipped with individual thermostat controls and you just have to place your dishes onto the heated surface and adjust to the desired heating temperature.

The cold plates just need to be cooled in any refrigeration unit and will stay cool for hours on the buffet line.

Mayfair Hot Food Warmers and Cold Plates add convenience to buffet set-ups beyond the normal buffet lines as they are lightweight and portable and cater to the different types of food display containers.

Available in three sizes – GN 1/1, 1/2 and 1/3.

Product Feature

SAFICO's New Cocktail Spoon and Fork

Add a new dimension to your buffet set-up or culinary presentation with the new Safico Cocktail Spoon and Fork!

These uniquely shaped serving pieces are designed with a looped handle that enables them to stand independently on a tray or dish. Made of 18/10 mirror-finished stainless steel and affordably priced against the competition.
