The ELECTRIC SAMOVAR from BEEM Germany

Traditional tea-making has now outweighed common tea-machines and tea-bags as the tea brews with a constantly optimum temperature. The Persian-originated Samovar has today become a popular feature in breakfast buffets and high-tea settings in many hotels and restaurants in these modern times.

Exclusively distributed by Sia Huat Pte Ltd, BEEM's electric samovars are each fitted with an infinite and energy-saving thermostat. This allows the strength of the tea to vary from cup to cup, satisfying individual tastes and preferences, boiled, hot or warm.

The bodies of the samovars are manufactured in 18/10 stainless steel with the handles and other attached parts in heat-resistant rigid plastic, metal or porcelain. For higher demands, one can also order (on indent basis) 24-carat fully gold-plated models.

Designed in traditional, classic, contemporary and modern, the samovars are available from 3 liters to 15 liters capacities.

For more information on these samovars, contact your Sia Huat/Hocatsu rep today.

SH005

Criminal Name: Rafael Marra, Purchasing Assistant

Jailed since: 23 April 2007

Cell: Purchasing
